About us

Un'common | Furniture made of marble

Un'common is a Polish furniture brand founded by Gosia Korycka and Maciek Korycki in Łódź, Poland. Every day we carefully observe the world wanting to enrich it with beautiful, functional and timeless objects. Our furniture should not only be well-designed - it should be a feast for the senses. Nothing can produce this effect quite as good as marble.

It is a beautiful, noble and natural material that has been used for centuries in architecture, art and everyday life. There are many different stone quarries, offering different types and colours of marble. However, because it is a natural material formed in a very complex process, it is virtually impossible to extract two identical pieces of stone. In our opinion, in a world ruled by plastic and mass production, this thrill of surprise is a bit of genuine luxury, reserved only for natural materials and their enthusiasts.

We design furniture and accessories for our clients which we truly believe can help them to create a perfect space to live.

We entrust the production of our furniture to the greatest specialists. Yet we know everything about the process of their creation. We believe that our greatest value is respect for the materials from which we create our furniture and the work of human hands.

During Maison et Objet 2021 we are glad to present our latest collection TEXTURE. This collection has been inspired by the textures of the world around us. We created it to focus on the shapes of our products and on how they feel to the touch. We discovered new ways to handle our beloved marble. We gave it a texture you could feel with your hand without affecting the convenience of everyday use.
